

# CROWN WING LOCKERS for Beechcraft KING AIR 90, 200 & 300 Series

OPTIMIZE CARGO CAPACITY WITHOUT PERFORMANCE LOSS

KING AIR  
90, 200,  
300 Series

Available for all 90, 200 and 300 series King Airs, Raisbeck's **Crown Wing Locker System** (CWLS) is capable of carrying up to 600 pounds of additional cargo in 17 cubic feet of luggage space. Our Crown Wing Lockers easily handle skis, snowboards, golf bags, luggage and fishing equipment, and they are compatible with all Raisbeck Performance Enhancement Systems.

External to your aircraft's cabin, Raisbeck's Lockers help prevent interior wear-and-tear, reduce cabin clutter, and return cabin space to your passengers. Fully certified for FAR Part 135 operations, our Crown Wing Lockers feature a Medeco lock-and-key security system and watertight seals, keeping contents clean, dry and secure.

Lightweight composite construction provides infinite-life structural integrity, while our aerodynamic design minimizes drag, resulting in no performance penalty. Moreover, Raisbeck Lockers can be removed easily for airplane maintenance and inspections.
